## PROJECTS

### AI Agent Chatbot :

My designed agent chatbot, DataNarrate, can intelligently respond to operational queries—such as checking today's coffee stock ensuring fast, reliable, and context-aware assistance. Had Designed both Customer and Admin Section

📍 <https://blens.ai/>

AI Driven Lead Management System(Admin,Manager,User,Super Admin)

Fuel AI is a smart lead management system that helps businesses capture, organize, and convert leads through automated, AI-powered workflows. It connects multiple channels like email, WhatsApp, SMS, and calls, using smart scoring and AI agents to improve follow-ups and boost conversions.

### Panjabiz Ecommerce(Admin & User):

Panjabiz is an online platform designed to connect local businesses and communities by offering a marketplace for services, properties, jobs, producers and more. Users can register for a free account to explore listings, showcase their enterprise and engage with the community.

📍 <https://panjabiz.com/>

AsiaCarbonxchange Website Login to a certain section :

This system is a step-by-step Solar Account Setup and Verification flow, where the user selects their inverter brand, connects their solar account, fills in personal and system details, and finally submits required documents and consents.

📍 <https://asiacarbonxchange.org/>

### Italy Money Exchange :

This system lets users manage USD-to-BDT balance, request money, and transfer funds through an API. Admins can update rates, add balance, and monitor all transactions with simple reports.

### NASA Space App Challenge :

Designed the Whole Exoplanet related Mobile App and Prototype using Figma.
